

Meeting Your Changing Needs With High Sensitivity

Taking the next step from MILLIPLEX[®] multiplex assays to the SMCxPRO[®]

Screen

xMAP[®] INTELLIFLEX[®]

- Widest dynamic range of any xMap platform
- Multiplex up to 500 analytes
- Compatible with existing MILLIPLEX assays

Stratify

SMCxPRO System

- High sensitivity (fg/mL) quantification
- Analysis in <1 hour
- Bead-based kits
- Fluidics-free system

The combination of platforms allows for the detection and exploration of the biomarkers at different levels in your samples.

Life Science Applications

Custom DNA / RNA Synthesis

Immunoassay Development

ELISA / RIA

Multiplex Assays

Single Molecule Counting

Antibodies

IHC / IF
