

# TRADE DISPLAY

Join us for  
morning tea!

Wednesday  
The 2nd October  
9:30am to 11:30am

TRI  
Level 7  
Tea Room

Photocrosslinkable  
Hydrogels for  
3D Cell Culture  
and Tissue Engineering

● ● ● Transform your 3D cell biology ideas into reality!

- ✓ All LunaGel™ ECMs are semisynthetic, packed with bioactive motifs, and can be rapidly and reproducibly crosslinked under cell-friendly conditions by exposure to visible light in the LunaCrosslinker™.
- ✓ The LunaGel™ photocrosslinking technology enables you to generate the most translational in vitro models of human biology within just minutes.
